RELIANCE

GET THE INTERNET THAT'S POWERED BY A NETWORK THE WORLD TRUSTS

About a fifth of the world's Internet traffic travels on our global IP network. With Reliance Dedicated Internet Access (DIA), your enterprise has the distinct advantage of this network that has its presence across the world's major Content Hubs, Internet Exchanges and Public Clouds.

Reliance Dedicated Internet Access (DIA) makes Enterprise-grade Internet available for your workplace locations in a wide range of bandwidth options. It is ideal for enterprises in India that need secure office Internet for accessing public Cloud, running mission-critical applications on the Internet, managing their websites or for simply accessing the Web.

Powered by one of the world's largest IP networks seamlessly integrated with a resilient terrestrial network in India, Reliance DIA provides seamless access to Web content across the globe.

Global content providers and OTT players targeting the Internet user base in India can also derive significant benefits via this service. It enables content owners to deliver content efficiently to 100% Internet users ('eyeballs') in India in minimal hops.

With Reliance DIA, you have the option of our cloud-based comprehensive DDoS protection service that wards off DDoS attacks and quickly activates remedial measures in case of an attack, thus keeping your business virtually unaffected by these attacks.

If you want to give your business the advantage of secure Internet connectivity that rides on Reliance's own global robust IP backbone, get in touch with us today.

KEY FEATURES

— Powered by an unparalleled global network combined with a resilient India network that connects to global Content Hubs, Internet Exchanges and Public Clouds

— Multiple international IP gateways in India
